

AKAMPREET SINGH SANDHU

Full Stack Engineer | Backend
Systems | API Design | Scalable &
High-Performance Systems

Versatile and Results-Driven Software Development Engineer with strong expertise in full-stack development and enterprise application design. Committed to building scalable, efficient, and high-performance solutions, leveraging modern technologies to drive innovation and deliver impactful business outcomes.

Gurgaon, Haryana

PROFILE SUMMARY

- Full Stack Engineer** with nearly 2 years of proven expertise in building scalable enterprise applications, leveraging **ASP.NET, AngularJS, and SQL Server** to deliver high-performance, production-grade systems handling large-scale transactional data.
- Performance Optimization Specialist**, driving **40-70% improvements** in application and query performance through API restructuring, indexing, query optimization, and efficient data retrieval strategies across high-volume modules.
- Database & Data Engineering Expert**, implementing **table partitioning, data archival strategies, and optimized stored procedures** to efficiently manage millions of records and ensure long-term platform scalability.
- Backend Architecture & API Design Leader**, designing **modular, scalable RESTful services** that enhance maintainability, improve response times, and support high-traffic enterprise platforms.
- Automation & Monitoring Innovator**, building **automated notification systems, performance dashboards, and monitoring frameworks**, improving operational efficiency by up to 60% and enabling proactive issue resolution.
- Productivity & User Experience Enhancer**, delivering impactful features such as **Quick Search navigation and role-based data access mechanisms**, reducing user navigation time by up to 80-90% and improving system usability.
- Collaborative Problem Solver & Emerging Technical Leader**, working closely with **product managers, architects, and stakeholders** to translate business requirements into scalable technical solutions, backed by strong fundamentals in **DSA, system design, and engineering best practices**.

TECHNICAL SKILLS AND ANALYTICAL EXPERTISE

- Languages & Programming:** C++, C#, JavaScript
- Frontend Engineering:** AngularJS, HTML5, CSS3, Bootstrap
- Backend & API Development:** ASP.NET, REST APIs, Web API Development
- Database Technologies:** SQL Server, MySQL, MongoDB
- Core Engineering Concepts:** Data Structures & Algorithms, OOP, System Design, DBMS
- Tools & Practices:** CI/CD, Git, Visual Studio

CORE COMPETENCIES

- Software Development Life Cycle (SDLC)
- Full Stack Application Development
- API Design & Performance Optimization
- Backend System Architecture & Scalability
- Database Performance Tuning & Optimization
- High-Volume Data Processing & Management
- System Performance Monitoring & Automation
- Modular & Scalable Solution Design
- Cross-Functional Collaboration
- Stakeholder Management Strategies
- Production-Grade Application Development

ACADEMIC & LEADERSHIP ACHIEVEMENTS

- JEE Main 2020 - All India Rank 6922:** Ranked among the **top percentile candidates nationwide** in one of India's most competitive engineering entrance examinations, demonstrating strong analytical aptitude and problem-solving skills.
- Joint Cultural Secretary, Engifest Cultural Council:** Led a **1,000+ member volunteer team**, collaborating with **100+ colleges** to successfully organize large-scale university cultural events, showcasing leadership, stakeholder management, and execution excellence.
- National-Level Football Representative (SGFI):** Represented at **SGFI National and State Football Tournaments**, exhibiting discipline, teamwork, and competitive excellence at inter-school and national levels.

WORK EXPERIENCE

Associate L1, General Technology Publicis Groupe – Publicis Resources | May 2024 – Present

Key Result Areas:

Application Performance Engineering & Optimization:

- Spearheaded end-to-end performance optimization initiatives, improving application responsiveness by **40–60%** through API restructuring and efficient data handling strategies.
- Led database performance tuning by optimizing complex queries, indexing, and stored procedures, achieving up to **70% reduction in execution time** on large-scale datasets.

Scalable Architecture & High-Volume Data Management:

- Architected and implemented **data archival and table partitioning frameworks** to efficiently manage millions of records, ensuring long-term platform scalability and performance stability.
- Designed **modular, scalable backend APIs**, enhancing system maintainability and enabling seamless handling of high-traffic enterprise modules.

System Design & Secure Data Navigation:

- Engineered advanced **role-based navigation systems**, improving user experience by enabling secure and dynamic data traversal with **50% faster record access efficiency**.
- Delivered enterprise-grade backend solutions aligned with security, access control, and operational workflows.

Automation & Operational Efficiency Enhancement:

- Developed and deployed **automated notification systems (DBMail & scheduled jobs)**, significantly reducing manual intervention in vendor communications and operational follow-ups.
- Implemented automated reporting mechanisms for business-critical metrics, driving **60% improvement in system monitoring efficiency**.

Monitoring, Observability & Performance Governance:

- Built **API performance monitoring dashboards** with real-time insights, enabling proactive identification of bottlenecks and data-driven performance improvements.
- Established performance tracking and reporting frameworks to support continuous optimization and management visibility.

Product & Platform-Level Innovation:

- Designed **Quick Search and cross-module navigation capabilities**, reducing user navigation time by **80–90%** and significantly enhancing platform usability.
- Delivered platform-wide enhancements impacting multiple business modules, driving consistency, usability, and system-wide efficiency.

Cross-Functional Collaboration & Solution Delivery:

- Partnered with **product managers, architects, and business stakeholders** to translate business requirements into scalable, high-performance backend solutions.
- Played a key role in aligning technology implementations with business goals, ensuring seamless execution across product and engineering teams.

ACADEMIC DETAILS

- Bachelor of Technology (B.Tech.) in Software Engineering** | Delhi Technological University | Jul 2020 – May 2024

PERSONAL DETAILS

Date of Birth: 3 March, 2001
Language Known: English, Hindi
Gender: Male
